LinkedIn/Twitter: [@yukanagai](https://www.linkedin.com/company/yukanagai)

Hello! I'm Yuka. I like to create beautiful web applications with a strong focus on design and interactivity. I'm excited to continue learning and solving complex problems with creativity. I have a background in business development, and a love for hustle, innovation, and willingness to take risks.

Front-end: HTML5 / CSS (SASS) / Javascript (jQuery) / React / SVG / Sketch.io / D3

Back-end: Ruby/Rails / Node.js (Express) / API integrations / PostgreSQL / MongoDB / Sinatra / Jasmine

General Assembly

Aug 2015 - Nov 2015

Web Development Immersive, NYC

CITY/SOUNDS.io

- CITY/SOUNDS is a location-based playlist generator that creates playlists out of artists from a city. Each city's real-time weather condition is animated using CSS3.
- Built using React/Node.js, and integrated with Spotify's Web API, Echo Nest's API, and OpenWeather API.

[AUDIEM](#)

- Audiem is a visual music streaming app that marries an audio and visual experience.
- As one of two developers, Audiem won runner-up at a 24 hour GA hackathon.
- Technology stack: React, JavaScript, Node.js, and integrated with Spotify and Instagram's APIs.

[Catcademy: Outcomes Tracker](#) (username: Bobby, password: password)

- The tracker helps teachers/graduates track employment-success rates using charts, graphs, and surveys.
- I was responsible for the front-end design and development, including creating the color scheme, designing the logo, and animation using HTML, CSS/SASS, and jQuery. We also used React, Ruby/Rails, JavaScript, Chart.js, and ActionMailer.

Workable

Jul 2014 - Aug 2015

Business Development Manager, NYC

I joined a Greek HR startup that was in the midst of launching their US expansion. I was responsible for kicking off their first US office in NYC, which ended up being just me as the team relocated to Boston. I held my own by remotely managing Workable's field sales and customer growth through event planning, sales, and customer support.

I also launched and drove [Talent Hackers](#) in NY, Boston, and PA - a community-driven event series for hiring managers and recruiters. We had panelists and sponsors from Stack Exchange, HubSpot, Etsy, WeWork, and more.

UK Trade & Investment

Mar 2012 - Jun 2014

Business Development Associate, NYC

I won the UK 7+ US tech businesses to expand their offices to the UK every year - including high growth companies like Kickstarter, Gust, and Paddle8. I also played a key role in growing UKTI's relationships with New York's tech community through networking, outreach, and event planning (a few which have involved the Prime Minister and Prince Harry).

Emerson College

Sept 2009 - May 2011

B.S. Marketing Communications, Boston
