MongoDB
Sinatra
SVG
Velocity.js
Sketch

General Assembly   Aug 2015 - Nov 2015
Web Development Immersive, NYC

City/Sounds.io (http://citysounds.herokuapp.com)

- City/Sounds is a location-based playlist generator that dynamically creates playlists out of artists from a city, and animates the city's weather condition in real-time.
- Built using Spotify's Web API, Echo Nest's API, OpenWeather API, React, Node.js/Express, and CSS3 animation.

Catcademy: Outcomes Tracker

- The Outcomes Tracker is an online portal built for a fictitious bootcamp that allows teachers/graduates to track employment statuses across the program through charts and surveys.
- Worked as a group using Ruby on Rails, React, JavaScript, Chart.js, and ActionMailer in an agile environment.
- Primarily worked on the front-end design and development of the site using HTML, SASS, and jQuery.

Code & Design

- Code & Design is a Wiki-style web-app where users can create an account, and post and share interesting articles about code and design. Posts are editable by the user, and can be searched by tags.
- Built using Ruby/Rails, Javascript (jQuery), and PostSQL.

Workable   Jul 2014 - Aug 2015
Business Development Manager, NYC

Remotely managed field sales and customer growth through event planning, sales, and customer support.

UK Trade & Investment   Mar 2012 - Jun 2014

Business Development Associate, NYC

- Worked on the tech team supporting companies with their international expansion strategies between NY/NJ and the UK.
- Connected NYC entrepreneurs with UK's tech initiatives including events with the Prime Minister and Prince Harry.

Education

Emerson College   Sept 2009 - May 2011

B.S. Marketing Communications, Boston

General Assembly   Aug 2015 - Nov 2015

Web Development Immersive, NYC

12-week full-time bootcamp dedicated to learning full-stack programming skills.
