General Assembly   Aug 2015 - Nov 2015
Web Development Immersive, NYC

CITY/SOUNDS.io
- CITY/SOUNDS is a location-based playlist that creates playlists out of artists from a city. Each city's real-time weather condition in also animated using CSS3.
- The single-page React/Node.js app is integrated with Spotify's Web API, Echo Nest's API, and OpenWeather API.

Catcademy: Outcomes Tracker
- We built a React app to help teachers/graduates track each program's employment-success rates using charts, graphs, and surveys.
- I was responsible for the front-end design and development, including creating the color scheme, designing the logo, and implementing responsive design and animation using HTML, CSS/SASS, and jQuery.
- The rest of the app is developed using Ruby on Rails, React, JavaScript, Chart.js, and ActionMailer.

Code & Design
- Code & Design is a Wiki-style Rails app where users can create an account, and post, share, tag, and search topics.
- I used PostgreSQL to create a relational database between articles, tags, and users.

Workable   Jul 2014 - Aug 2015
Business Development Manager, NYC

I joined a Greek software startup to kick off their first US office in NYC, which ended up relocating to Boston. I held my own in NY, managing sales, building relationships, and organizing events with the local tech/SME/HR community (i.e. Indeed, SimplyHired, StackExchange, Etsy, HubSpot, etc).

UK Trade & Investment   Mar 2012 - Jun 2014

Business Development Associate, NYC

I won the UK 7+ US tech businesses to expand their offices to the UK every year - including high growth companies like Kickstarter, Percolate, and Shutterstock. I also played a key role in growing UKTI's relationships with New York's tech community through event planning, networking, and outreach.

Emerson College   Sept 2009 - May 2011

B.S. Marketing Communications, Boston

General Assembly   Aug 2015 - Nov 2015

Web Development Immersive, NYC

12-week full-time bootcamp dedicated to learning full-stack programming skills.
